Detailed Description
Claims

English Abstract

A system for dynamic, real time **transfer** of **money** electronically from one individual to another without the need for either the transferor or transferee to have **credit card** or bank account, uses, for example, existing ATM networks. Real-time fund transfers can be further controlled based on selected criteria. The method includes depositing cash or check **funds** into a **transferor** primary account coupled to a financial network wherein the cash or check funds are immediately available for transfer, transferring a portion of the **funds** to a **transferee account** which is a **subaccount** of the transferor primary **account**, and withdrawing **funds** from the **transferee** account using a transferee account access card and a personal identification number from any access...
...be deposited directly to transferee accounts. The system and method provide easy and convenient electronic **money transfer** with immediate availability of **funds** for **money transfer** from a sender's account without requiring either the sender or recipient to have a bank account or **credit card**. It is especially beneficial for members of the unbanked population.

Detailed Description

... exemplary embodiment of the present invention, a transaction is initiated when an individual desires to **transfer money** to a third party, such as a friend or relative. The recipient can be located...
...access to an ATM network. According to an exemplary embodiment of the present invention, no **credit** or debit **card** or bank relationship is required. Initially, a transferor's primary account is established and linked to multiple transferee **subaccounts**. For example, primary **accounts** and linked **subaccounts** can be pre-established and assigned to customers during a registration process that occurs prior...

Claim

... cash bunch acceptor mechanism and an optical check reader/acceptor mechanism.

22 A method of **transferring money** without using a **credit card** or a funded bank account, comprising:
a. depositing **funds** into a **transferee account** which is a

Search Report from Ginger R. DeMille

subaccount of a transferor primary **account**, wherein a portion of the funds are substantially immediately available for use from the transferee...of claim 22, wherein in the network includes a ATM network.

25 A system for **transferring money** without using a **credit card** or bank account, comprising:

a. a first ATM receiving a funds deposit and a designation of a portion of the **funds** deposit to be **transferred** from a transferor's primary account to a transferee **account** which is a **subaccount** of the primary **account**, the first ATM being capable of determining an amount of the funds deposit so that...

...the first ATM,
the central processor receiving deposit transaction data related to the deposit and **transfer of funds** from the first ATM, at least one database of the central processor being updated with...ATM coupled to the central processor system,
the second ATM receiving a withdrawal request for **funds** from the **transferee** account, the second ATM providing withdrawal transaction data to the central processor system and receiving...by a computer system operated by a third party service provider.

34 A system for **transferring money** without using a **credit card** or bank account, comprising:

a. a first ATM receiving a **funds** deposit to a **transferee account** which is a **subaccount** of a transferor primary **account**, the first ATM being capable of determining an amount of the funds deposit so that...

...second ATM coupled to the central processor, the second ATM receiving a withdrawal request for **funds** from the **transferee** account, the second
